

ASHLAND COUNTY RESOLUTION #

WALLEYE SIZE AND BAG LIMIT ON CHEQUAMEGON BAY OF LAKE SUPERIOR

THE PROBLEM : The current slot size of 15 to 20 inches for Walleye with one fish over 20 inches, along with a 5 fish daily bag limit on the waters of Chequamegon Bay in Lake Superior and the Bad River are allowing the resource to be exploited by fishermen.

WHERE AS: Too many fish are being harvested from this watershed.

WHERE AS: Mature fish over 20 inches, which are prime breeding stock for the future are also being exploited.

WHERE AS; Many area inland lakes have a more restrictive bag and slot size limit.

BE IT RESOLVED: At the Wisconsin Conservation Congress Annual Spring Hearings held in Ashland County on April 10 th, 2006 take corrective action to stop this exploitation by establishing a (3) fish total bag limit with one fish over 28 inches and a slot size of 15 to 20 inches.
